

Huangshan Huasu New Material  
Science & Technology Co., Ltd  
黄山华塑新材料科技有限公司

## COMPANY PROFILE

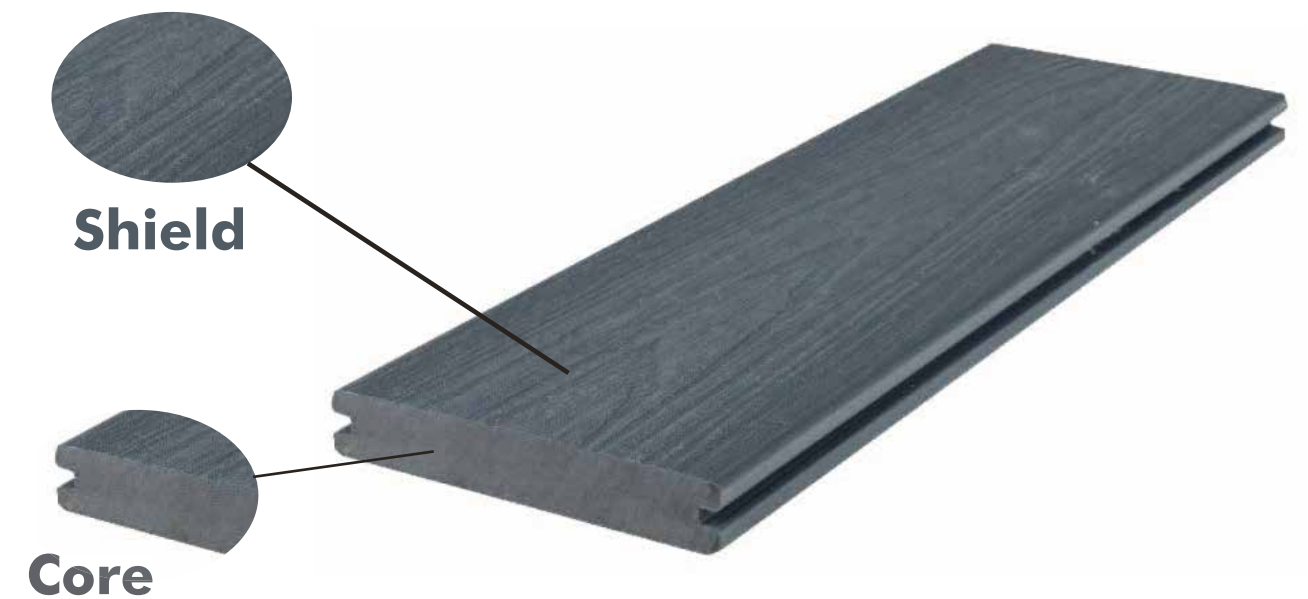

Huangshan Huasu New Material Science & Technology Co., Ltd is a professional manufacturer of new eco-friendly wood plastic composite products in Huangshan, China. We have over 15 years experience providing WPC. Over those years, we have grown into a large Enterprise and one of the biggest players in the WPC market with 50 extruding lines and 200 employees. Annually we produce 1000+ containers with annual sales turnover of over USD20,000,000.

Our unique WPC profile is made from premium bio-fiber & Grade 'A' HDPE making it superior to natural timber with much less propensity to rot or crack. The beautiful aesthetics of our select timber grain appearance makes our WPC superior to plastic profiles for outdoor application. We have a wide range of colors and styles to cover all customer tastes and demands.

We provide you with ultra professional manufacturing of WPC decking, tile, wall cladding, fencing and other decorative materials. Great service is our mission, high quality is our obligation, we pride ourselves on a "customer first" service.

## Co-extrusion Decking

- Ultra-low maintenance
- Longevity and durability
- Scratch and stain resistant

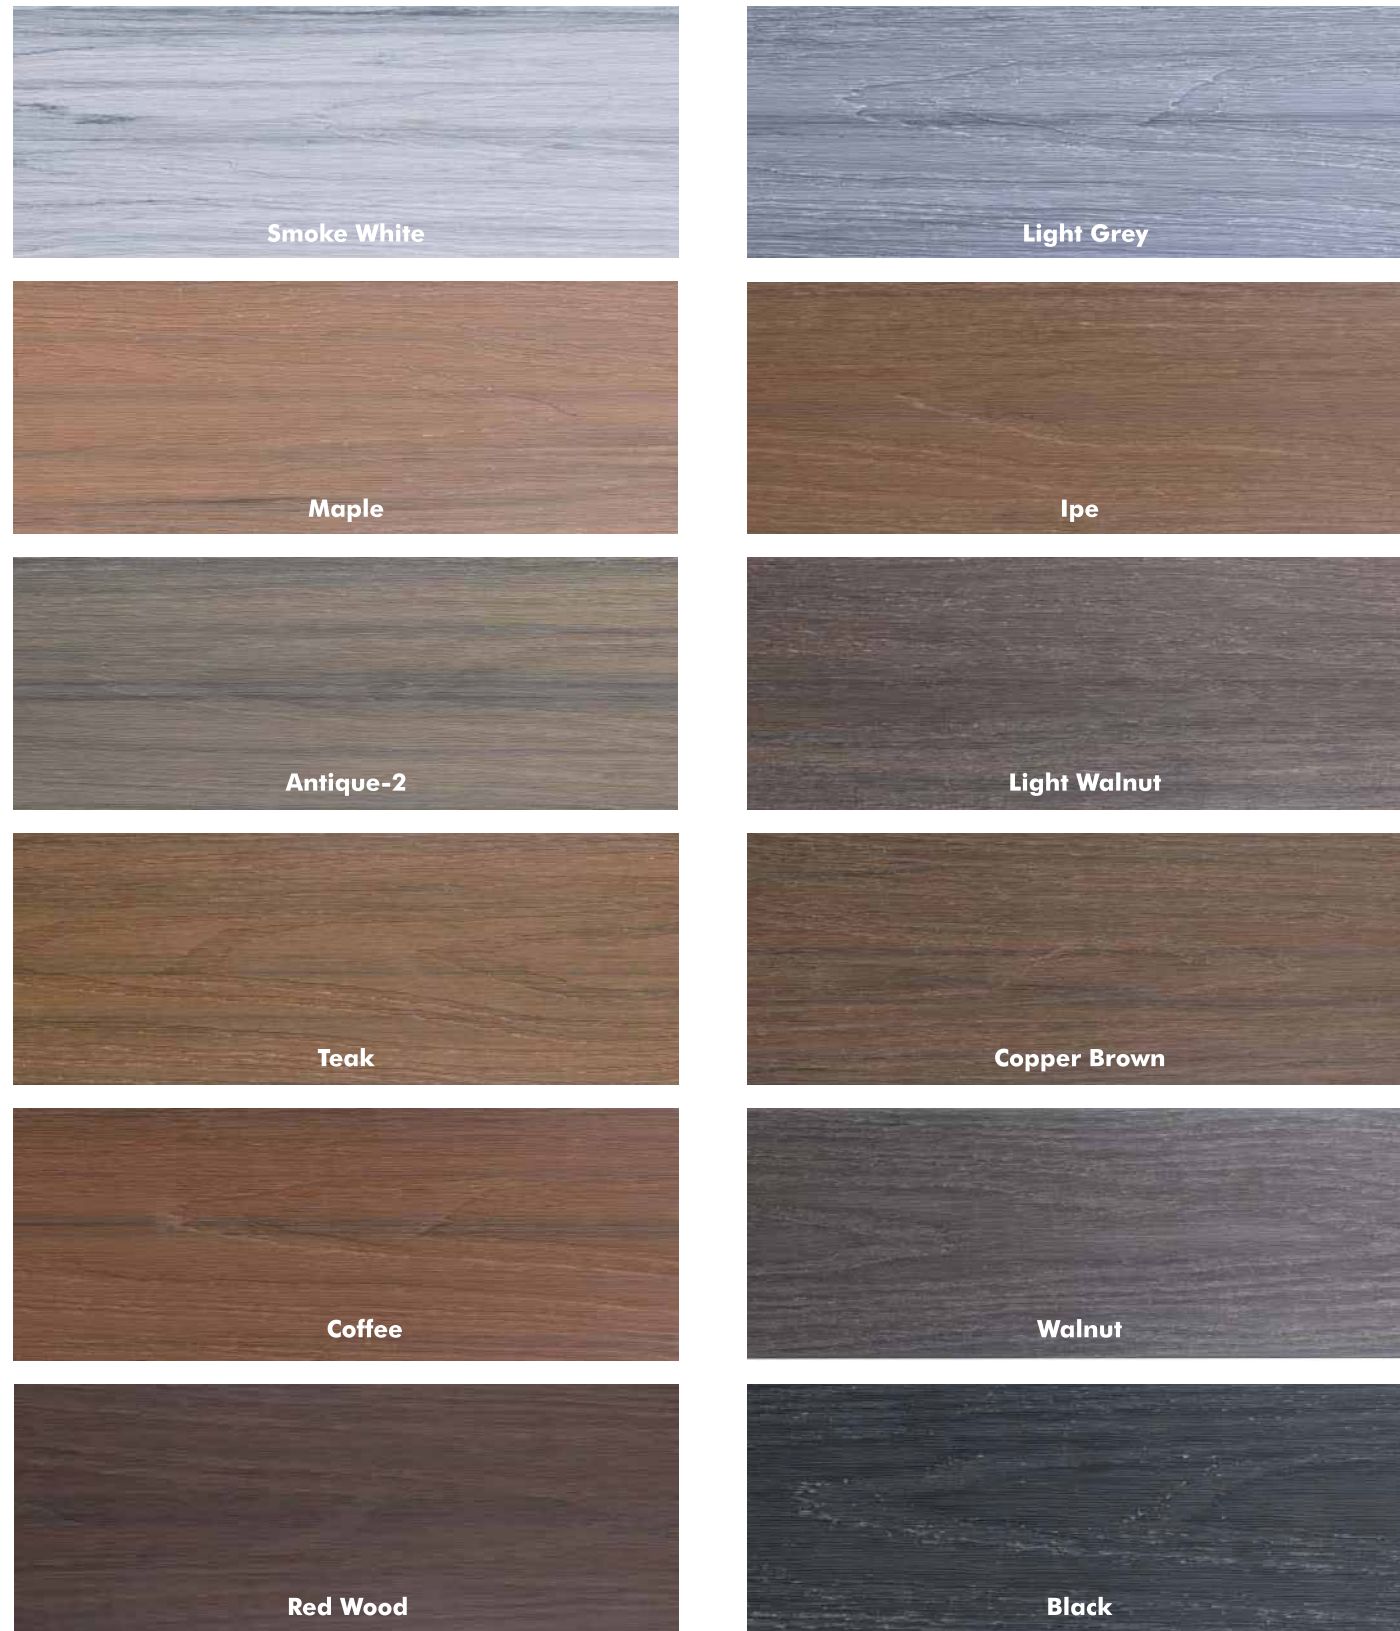

Co-extrusion WPC is the upgrade version of traditional WPC, with the traditional wpc as the core layer, outside the 360 degree covered with a protective layer.

The core layer and the protective layer are molded by extrusion at the same time.

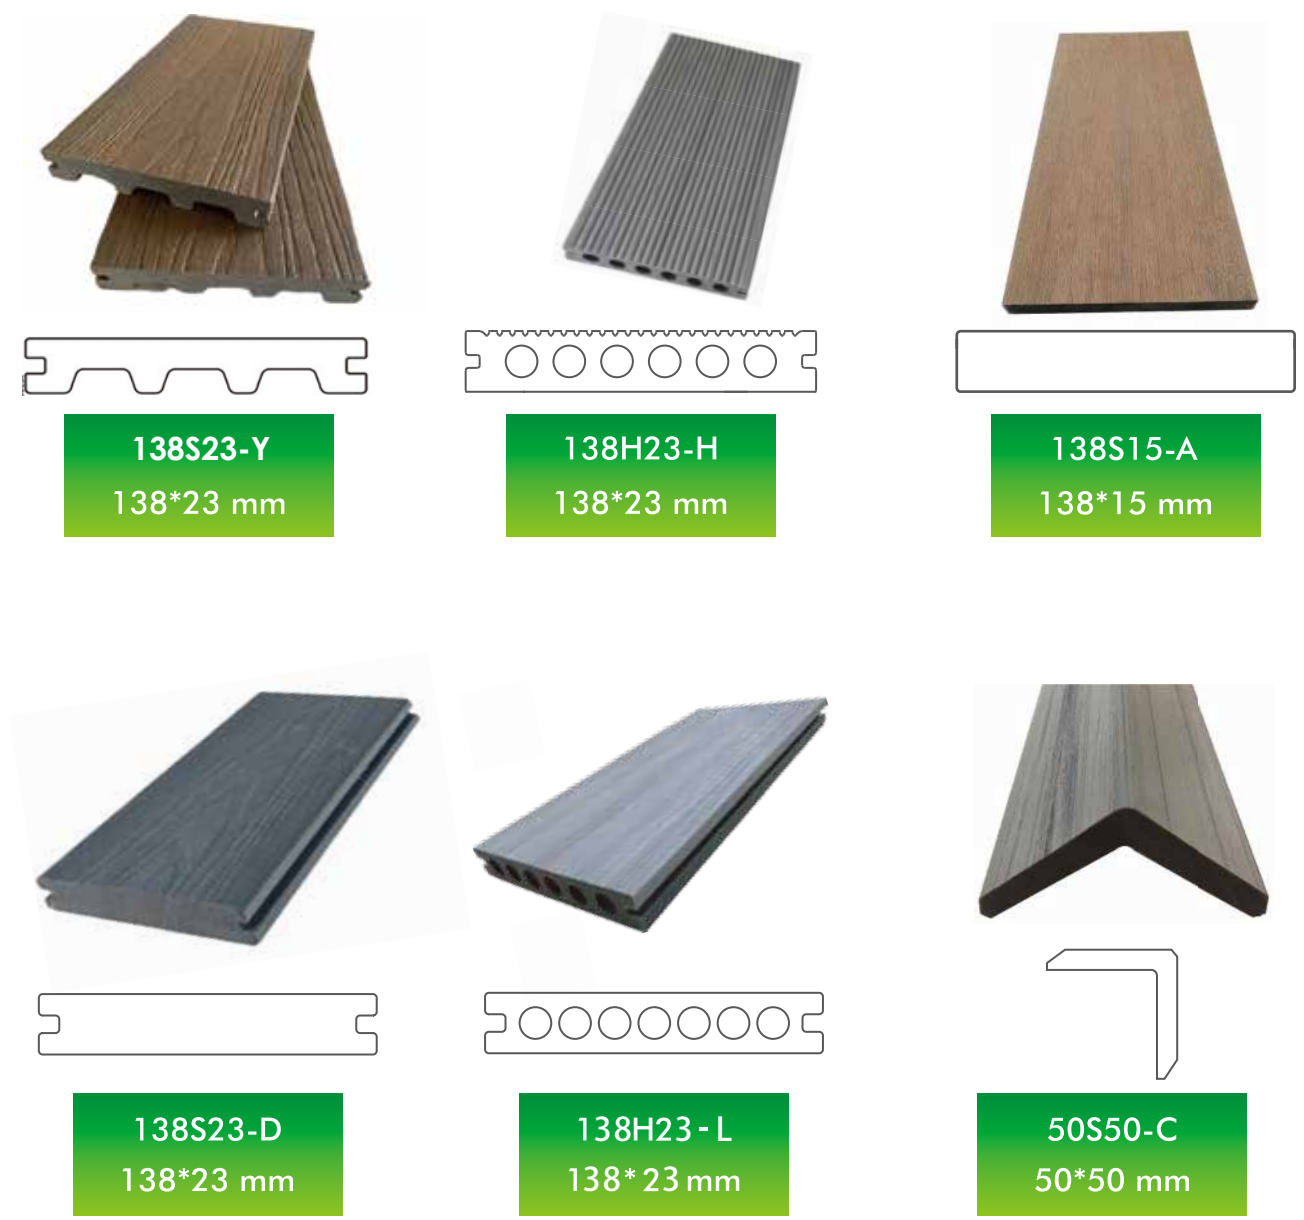

Their attractive appearance is effectively preserved by a protective polymer sleeve, which makes them highly resistant against even the harvest of weather, as well as most types of stains, damage and casual wear and tear.

# Elegance Color Choice

# Popular Co-extrusion Decking Profiles

Available in solid and hollow profiles for both residential and commercial applications, HOHEcotech® from HuasuWPC delivers attractive good looks and durability to outdoor composite decking.

## Co-extrusion Tiles

Tiles enjoy all the advantages of the decking floor, but is more easier to install and thus win favor from those customers who want to bring as much creativity in outdoor decoration as possible.

## Co-extrusion Wall Panel

Wall Panel is an ever increasingly popular choice for finishing the outside of commercial and domestic buildings.

It is suitable for offices, hotels, architectural fascias and leisure centers, as well as providing a quality refurbishment to modern dwellings.
